If you ever encounter problems with your Digital/HDTV service, please follow the steps below to reboot your set-top box:

- 1. Unplug your set-top box from the electrical outlet or from the back of the set-top box. The set-top box will be a black box that has "AMINO" written on the top or front of it.
- 2. Check to see if the power light is off on the front of the set-top box. Depending on the model, the power light will be green, red, or blue. If the light is still on, you have unplugged the wrong cord. Make sure the power light is off before proceeding to the next step.
- 3. Leave the box unplugged for at least 30 seconds and then plug the power cord back in. Once the power cord is plugged in, you should notice the power light on the front of the set-top box come back on.
- 4. Once power has been restored to the set-top box, you should give the set-top box time to reboot. This will generally only take a minute or so, although if a system update has been added, it may take longer. Once the set-top box is done rebooting, you may need to input a password. If you are prompted to do this, the password will always be 1 2 3 4. After putting in 1 2 3 4 on your remote control, hit the OK button, If your set-top box is set to auto login, you should not need to put in a password.

If, after rebooting your set-top box, you are still having problems please take note of the message on your TV and call our office at 319-276-4458. We will troubleshoot the problem over the phone or we will have a technician stop at your residence as soon as possible.
